

HEADSTART

Headstart Stock Optimizer extension software

20 percent of items you need to stock cause 80 percent of the materials shortages in the business - do you know what these products are in your company?

Headstart Stock Optimizer knows.

Headstart Stock Optimizer is extension software for the SAP system which transforms control of the company reserve stocks into a controlled performance.

Stock Optimizer monitors availability of products and calculates the requirements of the reserve stocks systematically and precisely for every product. This way, availability of products improves, excessive reserve stocks are reduced, and stock maintenance costs fall.

Stock Optimizer is an opening move to success:

- stock turnover rate increases
- availability of products improves
- previously labour-intensive maintenance routines of stock control parameters can be automated
- stock monitoring becomes easier
- stock shortages are reduced
- security of supply and productivity increase
- you save hard cash

Headstart Stock Optimizer is an SAP extension, and therefore a safe option compared to external stock optimization software. The Stock Optimizer extension software is a safe solution also in terms of purchase costs, as the price is tied to the real savings obtained by the client from the project.

Benefits revealed

Headstart offers the Stock Optimizer purchaser a one-year monitoring period culminating in an evaluation of savings, quantifying the reductions in stock holding costs and production stoppage days.

Let Headstart Stock Optimizer take your stock control to the same level as in companies specializing solely in stock control.

“Headstart Stock Optimizer and the right products rotate in your warehouse - fast”
